

# MAXIMIZE YOUR REVENUE WITH HOME ENERGY MONITORING.

With real-time consumption and production monitoring within 1% accuracy, Neuroio is the perfect value-add to any residential solar system. When you include Neuroio in your product portfolio, your business will enjoy all the benefits of our powerful customer engagement platform.

## POWERFUL PRE-SALE TOOLS

Install Neuroio consumption monitoring for customers not yet ready to go solar and get them thinking about their energy usage and cost savings in advance. Plus, you can use the data to perfectly size the system when they are ready.

## KEEP YOUR BRAND FRONT AND CENTER

Add your logo and business information to the Neuroio App and you can keep your business top of mind everytime customers check their energy use and solar production.

## MONITOR YOUR CUSTOMERS REMOTELY

With our handy Neuroio Admin Account, you can easily select any customer location to see live and historical data. Keep an eye on system performance and help your customers by providing recommendations for additional savings.

## STOP CUSTOMER BILL CONFUSION

Neuroio provides a simple way to educate your customers on their energy consumption and how their savings are being impacted.

## GET MORE BUSINESS THROUGH REFERRALS

The built-in referral tool within the Neuroio app is a quick and easy way for your customers to refer new business to you. Customize a rewards program, manage referrals and send cash rewards - all through your Neuroio Admin Account.

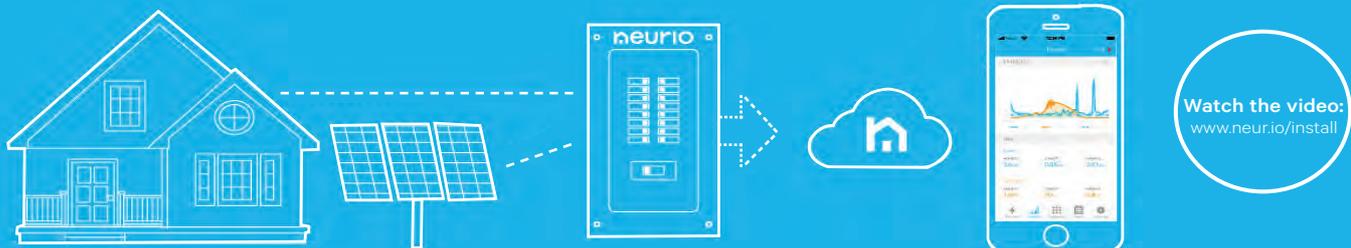

## STAND APART FROM YOUR COMPETITION

When you bundle Neuroio into your offering, you create a unique solution which makes it more compelling for customers to choose your company over your competitors.

**TRY OUR LIVE SOLAR DEMO ACCOUNT:**  
 Visit [my.neur.io](http://my.neur.io) or download the Neuroio Home app:  
**Login:** solar.demo@neur.io **Password:** Neur10solar

## HOW IT WORKS

Once the Neuroio meter is installed in the electrical panel, it will start sending energy data to a smartphone or computer. Customer have the ability to see how much their home is consuming and generating in real-time.
